Theology of the Body

Kindergarten - 8th Grade

Supplemental Religion Program

Theology of the Body is a teaching from Saint Pope John Paul II that focuses on God's true vision for the human person. It focuses on age-appropriate themes which help people of all ages understand and respect the gift of the human person in themselves and in others.

The teaching of Theology of the Body is rooted in God's love for us. By sharing this teaching in each of our classrooms, students will better understand the importance of why they have been designed by God in different yet equal ways.
